
Rugby School

Administrated from: Southern Office

Contract location: Warwickshire

Value: £60,000.00

Duration: August 2012 – September 2012

Sector(s): Education

Type(s) of work: Asbestos Removal

Description of work

Omega was instructed by the school to remove all asbestos materials from their recently purchased property, which was to be developed into a new sixth form centre. This project was scheduled a month before the new school year. As a result Omega was aware of the importance to keep to a strict deadline; extra measures were implemented to ensure the school opened as usual.

Method of work

The works involved removal of AIB ceilings and partition walls to various classrooms together with the removal of thermoplastic floor tiles and adhesive throughout the school building floor areas. Additional works involved removal of soffits and obsolete boilers and heating pipework.

Due to the consistent and high quality service provided by Omega, a strong client and supplier relationship has been formed. This has provided on-going projects with the school which has accumulated to a value of over £250,000.00 over the last couple of years.
